

**1** Definity Fairway Transitions SOLFX Lenses

**MANUFACTURER:** Essilor  
**DESCRIPTION:** Progressive sun lens designed for presbyopic golfers.  
**FEATURES:** Combines patented Dual Add 2.0 technology and Ground View Advantage of Definity lenses with advanced photochromic technology of Transitions SOLFX sun lenses to allow golfers to follow the ball more clearly. Lenses help enhance visual performance by intuitively adjusting to all outdoor sun conditions. They change from amber to a darker brown outdoors, improving contrast and depth perception to help golfers see the contour of the greens and better see the ball. Lenses also block 100 percent of harmful UV and UVB rays.  
**AVAILABILITY:** Material—Airwear polycarbonate; sphere : +4.00 to -7.00D; cylinder— up to -4.00D; add power: +1.00 to +3.00D; prism: up to 6.00D; systematic AR coating on Crizal Sun Mirrors with Scotchgard Protector (silver only); systematic Transitions treatment on Transitions SOLFX.
